# FIFA - Football World Cup Case Study

The FIFA World Cup, often simply called the World Cup, is an international association football competition contested by the senior men's national teams of the members of the Fédération Internationale de Football Association (FIFA), the sport's global governing body. The championship has been awarded every four years since the inaugural tournament in 1930, except in 1942 and 1946 when it was not held because of the Second World War. The current champion is France, which won its second title at the 2018 tournament in Russia.

The 21 World Cup tournaments have been won by eight national teams. Brazil have won five times, and they are the only team to have played in every tournament. The other World Cup winners are Germany and Italy, with four titles each; Argentina, France, and inaugural winner Uruguay, with two titles each; and England and Spain, with one title each.

**You have been employed as a Data Analyst Super Sport Gaming Coy. You were asked to perform a detailed five years analysis on FIFA world cup.**

# General Questions

1. How many countries have played in the world cup (5 Years)?
2. Get the total games played, win, loss, Goals for/against.
